**Job Description**

The [Faculty of Veterinary Medicine](#) of the Université de Montréal is the only French-language institution of its kind in North America. It stands out for the excellence of its research and training on its two campuses—one in Saint-Hyacinthe, at the heart of Quebec's agri-food region, and the other in Rimouski, within a rich coastal environment. A driver of change, it prepares tomorrow's leaders through

Assistant or Associate Professor of Infectiology and in  
Experimental Bioimaging

a “One Health” approach that brings together innovation, biodiversity, and sustainability.

The [Department of Pathology and Microbiology](#) fosters transdisciplinary collaboration that integrates the One Health concept in both teaching and research. We are also committed to restoring, protecting and promoting the health of companion animals, livestock and wildlife. Faculty members in the Department share a common goal of providing students, interns and veterinarians with high-quality theoretical, practical and clinical training in pathology and microbiology.

### **Day-to-day responsibilities**

Through your undergraduate and graduate-level teaching, and your research activities, you will contribute to the faculty’s pursuit of excellence. Furthermore, you will promote your discipline and actively participate in the daily activities of a renowned institution. As such, you will:

- Teach at the undergraduate and graduate levels and supervise graduate students (master’s and doctoral students and postdoctoral fellows);
- Develop an independent and innovative research program in infectious diseases and experimental bioimaging, focusing on imaging techniques (fluorescence, bioluminescence, X-rays, etc.) in vivo to study the dynamics of infections, explore novel diagnostic approaches, or address topics related to infectious diseases in animal production. Interdisciplinary collaboration is encouraged;
- Coordinate the Faculty’s experimental bioimaging platform and benefit from access to the Quebec Bioimaging Network;
- Secure competitive research funding from major funding agencies;
- Contribute to the advancement and visibility of the discipline (publications, conferences, scientific activities, and others);
- Contribute to the functioning of the institution through committees and working groups.

### **Qualifications**

- Hold a doctorate (Ph.D.) in a discipline relevant to the position;
- Have one year of postdoctoral experience or equivalent;
- Have experience in the study of host-pathogen interactions and animal models, using the proposed platform or equivalent;
- Demonstrate an ability to provide high-quality university teaching;
- Propose a high-level research program on topics related to animal production or animal health with the potential to develop internal, national, and international collaborations;
- Hold a Doctor of Veterinary Medicine (DVM) degree or equivalent will be considered an asset;
- Have adequate proficiency of the French language or be committed to learning it once hired,

Assistant or Associate Professor of Infectiology and in  
Experimental Bioimaging  
Universite de Montreal

through the Université de Montréal's French language support program, in accordance with the Université de Montréal language policy.

**Additional information about the position**

- Competitive salary and a comprehensive range of benefits;
- Expected start date: February 1st, 2026;
- Located at the Saint-Hyacinthe campus.

**How to submit your application**

The application file presented must include the following documents, to be submitted before November 5, 2025:

- A cover letter;
- A curriculum vitae;
- Copies of, or links to, three recent publications or research papers;
- A statement outlining your teaching and mentoring experience and approach;
- A research program proposal;
- Contact details of three referees who will be solicited for a letter of recommendation;
- A copy of your diplomas.

**Contact information**

Marie-Odile Benoit-Biancamano, Chair

Faculty of Veterinary Medicine, Department of Pathology and Microbiology
