Apply By Email

Job Description

The position focus is the development of a scholarly program that advances the knowledge and understanding of equine reproductive health as related to biology, physiology, endocrinology, pathology, immunology, and/or genetics. As a member of the Graduate Faculty, the successful candidate will be expected to participate in the training of graduate students and post-doctoral fellows. There is an expectation to publish peer-reviewed research in leading journals as a lead, collaborating, as well as sole author and secure extramural funding to advance the position's scope and reach.

Complete the Employment Application and upload the required documents. In your uploaded document please begin with a letter of interest (Cover Letter) that outlines your approach to the positions qualifications, effort responsibilities, and vision for innovative and impactful programs that address existing and emerging issues for a diverse and inclusive community. This letter is followed by the name, address, email, and phone numbers/webpage for at least three references for whom references letters can be sought for use in the faculty appointment process and career curriculum vita.
